Bimo Henokh Barata

Backend Developer

Jl. Karyawan I no.120, Tangerang, Banten • bimo.barata2@gmail.com • + 62 852 1707 3494 •
https://bimohenokh.github.io/MyPortoV2/

Backend Developer with experience building scalable applications and APIs using Python (Django) and Java (Spring Boot). Skilled in deploying services on Google Cloud Platform and using tools like Docker, PostgreSQL, and Nginx. Experienced in backend development, performance optimization, and working in agile teams. Eager to keep learning, especially in technologies like Kafka and Elasticsearch.

PROFESSIONAL EXPERIENCE

PT INTI UTAMA SOLUSINDO **Jakarta, Indonesia**

Backend Developer Python **AUGUSTUS 2024 – March 2025**

- Architected a flexible and scalable concoction medicine system designed for long-term maintainability and adaptability, allowing for seamless integration of future enhancements and modifications.
- Designed and implemented a dynamic document templating system to streamline and automate document generation, utilizing python-docs-template for increased efficiency and consistency.
- Collaborated with management team to implement features based on set requirements using Django with Server-Driven UI architecture in an agile work environment.
- Refactored code and optimized PostgreSQL database query to improve API response time.
- Automated API testing by creating test cases and scripts using Postman and JavaScript.

BANGKIT ACADEMY BATCH 6 **Jakarta, Indonesia**

Cloud Computing Cohort **FEBRUARY 2024 - July 2024**

- Gained proficiency in Google Cloud Platform (GCP) services, including Cloud Run, Cloud Storage, and various other GCP tools
- Acquired hands-on experience through practical demonstrations and projects, enhancing skills in deploying and managing cloud applications.
- Developed expertise in creating and hosting APIs using backend servers and deploying applications integrating machine learning models.
- Led the deployment of backend services that serve APIs for the final project, Silang, a software development project that uses machine learning to translate from hand sign language into Indonesian texts.

PROJECTS

VELAJAR - 5E LEARNING STRATEGY WEB APPLICATION

Django, Next.js, PostgreSQL, Docker, Docker Compose, Nginx

- Developed a full-stack web application to support the 5E learning strategy.
- Implemented the backend using Django REST Framework and the frontend using Next.js.
- Deployed the application on a virtual machine using Docker and Docker Compose.
- Configured Nginx as a reverse proxy to manage routing and enhance deployment security.

SPRING BOOT PROJECTS

Spring Boot, Java, PostgreSQL, Docker

- Built REST APIs for small-scale Java backend projects to practice Spring Boot MVC and backend principles. See https://bimohenokh.github.io/MyPortoV2/

EDUCATION

UNIVERSITAS INDONESIA **Depok, Indonesia**

Bachelor of Computer Science, Major in Computer Science **2021 – 2025**

Spring Boot, Django, NextJs, Java, Python, NodeJs, Typescript, PostgreSQL, Git, Docker, Google Cloud Platform

ADDITIONAL INFORMATION

- Program Management: SDLC (Software Development Life Cycle), Resource Planning, Jira, MS Project
- Technical Skills: Python, Java, Javascript, Typescript, Golang, C, HTML, CSS, Django, Springboot, FastAPI, ReactJs, NextJs, Tailwind, Bootstrap, Git, CI/CD, Kafka (learning), Elasticsearch (learning), Nginx, Docker, Podman, Google Cloud Platform, Linux
- Development Practices: Test-driven development (TDD), code refactoring, Git Flow, pair programming (familiar)
- Certifications: Bangkit Batch 6 Cloud Computing
